

Image tag: Image tag is used to insert an image on a webpage. Image tag is used along with four attributes.

```

```

- Images are not technically inserted into a webpage, images are linked to webpage.

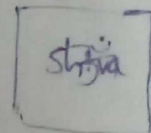

Attributes:-

- src :- specifies path to image (source)
- alt :- specifies if image not found an alternate text is displayed.
- height :- height of image
- width :- width of image

Code:-

```
<!DOCTYPE html>  
<html> <head> <title>Image tag</title> </head>  
<body>  
<h1>Image tag</h1>  
  
</body>  
</html>
```

output: image tag

③ Target attribute

The target attribute specifies where to open the linked document.

- self :- opens the linked document in same frame as it was clicked (this is default)

parent opens the linked document in parent frame.

top: opens linked document in full body of window
